

1st generation of PREMETS® devices expire!

All 1st generation PREMETS® from LEMAG will expire at the end of this year. With the 1st of January 2021 a part on the circuit board will cease to work, which restricts the functionality. This part cannot be reproduced. It is going to cause loss of calibration and setup data. Measurement accuracy therefore cannot be guaranteed.

We do not want to leave you without working control of your machinery. Therefore we grant a special discount on our new PREMETS® models for PREMETS® of the 1st generation with a serial number up to 39000. So upgrade your 1st generation PREMETS® now and gain access to exciting new functions and advanced technology of the modern PREMETS®. If you want to upgrade and use this special offer, please contact our sales team via sales@CMTechnologies.de.

PREMETS® SW (1st generation)

About 25 years ago, the PREMETS® SW made a ground-breaking step from mechanical to electronic sensors. Over time many parts have become unavailable and our stock has dwindled to near zero.

Repairs and calibration have become very difficult or impossible. So do not let your PREMETS® become an antiquity, get a good deal on a new PREMETS® in exchange.

PREMETS® X and M

Staying in the PREMETS family for all the advantages it is known for. The rugged exterior houses top class technology with easy to use software.

But there are many advantages of a more modern device. The new Kistler 6019A 11S sensor is capable of handling more extreme conditions and delivers more accurate results.

Data upload to the PREMETS® Cloud is possible for everyone, everywhere. Opening up a wide range of analytic tools and pre-build reports to use. Save time and manage your fleet with greater efficiency.

Old measurements can be used to establish trend analysis.

Your Benefits

- Discounted prices for the current generation of PREMETS®s
- Newest technology provides more functions and accurate results
- Enhanced capabilities of software
- Calibration and repair service
- DNV GL Eco Insight ready
- Keep the PREMETS® quality with its rugged design
- PREMETS® Cloud compatibility
